About Us

At DRYWAY, we're more than waterproofing specialists; we're innovators in the field of engineering solutions. Based in Australia, our company excels in the science of crack injection, chemical grouting, and waterproofing, transforming intricate challenges into effective, intelligent solutions.

Our commitment to innovation is matched by our dedication to the rigorous application of scientific principles, which has propelled us to the forefront of water ingress control.

Our team, a collective of experienced engineers and waterproofing professionals, embodies a passion for excellence and precision.

DRYWAY is not just about solving problems; we're about setting new standards, driving innovation, and shaping the future of waterproofing technology.

Sustaining the Future, Honouring the Past: Our Commitment to Environmental and Cultural Integrity

DRYWAY operates with a deep commitment to environmental sustainability, and we recognize, respect and honour the Aboriginal and Torres Strait Islander peoples as the original custodians of Australia. Our respect extends to their enduring connection to land, waters, and community.

We conduct our business with an acute focus on sustainable practices, lifecycle perspective, waste reduction, and energy efficiency.

This dual commitment to environmental stewardship and cultural heritage is fundamental to our philosophy, driving us to operate responsibly and respectfully.

Our Services

Quality Assurance & Quality Control

At DRYWAY, our team of skilled engineers and waterproofing specialists rigorously implement our hands-on QA & QC process of each project.

We actively monitor, inspect, and verify work quality, material standards, safety procedures and construction methods. This approach allows us to identify and rectify any deviations quickly, ensuring that every DRYWAY project not only meets but exceeds quality expectations.

Our on-site presence guarantees that our commitment to quality is more than a promise—it's a reality in every project we undertake.

Engineering

Our Services

Crack Mapping & Defect Reports

In the field of crack mapping and defect reporting, DRYWAY's team excels through meticulous on-site investigations employing precision and expertise.

With an extensive record of on-site experience, we bring unparalleled knowledge, making a substantial difference in tracking defects.

Once they are identified, we develop targeted action plans by integrating strategies into regular maintenance schedules, helping to extend the life of structures and maintaining their safety and functionality.

Our Services

Custom Made Methodologies

DRYWAY's extensive experience in water ingress control and concrete repair has reinforced our understanding that each defect often demands a unique solution. Against the common practice of "copy & paste" we concentrate on developing methods tailored to the specific needs of each case.

Our team, with its wide-ranging expertise in various materials and techniques from different manufactures, ensures the most effective solutions are specified. This involves a process of detailed analysis and innovative problem-solving. Our personalized approach significantly reduces the re-works rates, effectively addressing immediate problems and ensuring long-term structural integrity.

Project Management

DRYWAY's project management approach emphasizes a deep alignment with our clients' needs and objectives. We integrate their aspirations into every aspect of our work, ensuring tailored and effective project execution.

Our team's expertise in independent certification, due diligence, and auditing underpins our strategies, ensuring compliance with industry standards and ethical practices. This blend of client-focused planning and regulatory insight guarantees not only successful project outcomes but also adherence to the highest professional standards.

Additional Services

WORKFORCE

Despite Australia's skilled worker shortage, DRYWAY boasts a well-rounded team with diverse skills and certifications, ensuring uninterrupted project progress.

We further support our team and clients with exclusive technical assistance.

Consult us about our exclusive injection system technology to solve water leaks issues.

Injection Specialist

It is where precision meets expertise in resolving critical water leak areas.

Our proficiency and unique injection system extend to slab cracks, swimming pools, drains, concrete joints, and much more.

For us, every drop counts!

Call or send us an email requesting an estimate.
We look forward to serving you!
